Heat Transfer Laser Alignment System

Improve the accuracy and speed of your next heat transfer order with a laser alignment system. Laser Targeting Systems manufactures a versatile laser alignment system that is easy to use and set up anywhere in your shop. This system projects laser guidelines on top of the garment to ensure that the placement of heat transfers is exactly the same from for the entire order. Getting the proper placement and spacing for athletic jerseys is easier than ever before. This same system can also be used for screen printing as well.

Laser Targeting Systems provides alignment systems for embroidery, screen printing and heat transfer. All systems are customized for each shop based on the number and type of lasers. Laser Targeting Systems offers three types of commercial grade lasers: spot lasers, line lasers and cross hair lasers. Systems start as low as \$250. For more information, visit the Web site at www.lasertargetingsystems.com or call (800) 426-9416; or e-mail sales@lasertargetingsystems.com.
