

Heat Transfer/Sublimation Laser Alignment System

Aligning a Transfer on a Tile or Cutting Board

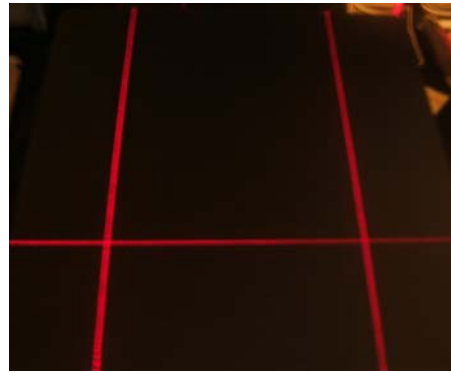

Instructions for using your Laser Alignment System from Laser Targeting Systems to produce a tile or cutting board with a heat transfer / sublimation transfer.

Step #1: Align Horizontal Line Laser

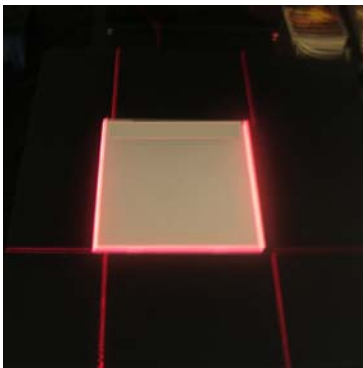

Align a horizontal Line Laser on the heat press pad.

Step #2: Align Two Vertical Line Lasers

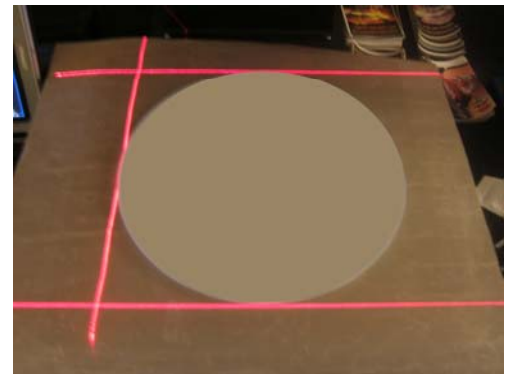

Align two Line Lasers perpendicular to the horizontal Line Laser in Step #1. The distance between these two line lasers should be based on the size of the tile.

Step #3: Align Tile the Press

Place the tile or cutting board on the heat press pad using the laser guidelines.

Align Cutting Board on the Press

Step #4: Align the Transfer & Press

Place the transfer on the heat press pad using the laser guidelines and close the press for the appropriate time.
